# How Your Business Can Benefit From The Cloud

## Photo Discovery

**BigMIND** analyses any image uploaded to the platform, allowing you to search by camera type, resolution, location, date taken, dominant colour and more.

## Preview RAW Images

**BigMIND** provides a centralized web console where you can preview all your RAW images and jpegs without adding any extra software. This is perfect for photographers who want the freedom to fine-tune their images.

## Mobile Friendly

The ability to access your images from your smartphone is essential to photographers. You can now share any file to any smart device, giving you greater access no matter where you are.

## Reduce Costs

Our top priority is to save you money, whilst keeping your data secure and accessible. **BigMIND** eliminates the need to invest heavily in IT storage equipment. You can also save money by reducing your infrastructure costs.

## Supports External Hard Drives

**BigMIND** automatically backs up newly produced images from external devices without any interference. You can rest easy knowing **BigMIND** is looking after your valuable photo assets.

## How It Works

- Sign up
- Set your entire company's backup in 5 minutes
- Add users and assign policies
- Backup will start automatically

### Zero Restore

Intelligent engineering makes prioritizes restoration from you local Hybrid + instead of the online storage

### Hybrid +

Backup a copy of all your files to a local server, network or external drive at any stage of the backup process.

### Lifetime Storage

**Big**MIND is designed to be the one stop cloud backup solution to last a lifetime

### Cold Storage

Ideal for rarely accessed data with a 3-5 hours waiting period for the first file restore, it is preferred for it's extreme affordable price and yet highly secure Amazon AWS.
